Aryanmanik98@gmail.com | +91-8476908346 | [LinkedIn](#)

## Objective

Experienced front-end developer with a passion for creating engaging and user-friendly websites using HTML, CSS, JavaScript, Vue.js, and PHP. Seeking to transition to the MERN stack and eager to stay up-to-date with the latest technologies and tools in the industry. Committed to delivering high-quality results and collaborating with cross-functional teams to achieve project objectives.

## Experience

### SOFTWARE DEVELOPER | IT HOURS SOLUTIONS LTD. | 14 MAY 2021-14 JAN 2023

- Worked On several admin panel projects related to user data management, utilizing HTML, CSS, JavaScript, Vue.js, and PHP.
- Conducted regular testing and troubleshooting to identify and resolve technical issues.
- Contributed to the design and development of responsive websites that provided exceptional user experiences.
- Demonstrated a strong understanding of web development best practices and principles, including code optimization and accessibility.
- Maintained up-to-date knowledge of the latest web development technologies and trends, and incorporated these into projects as appropriate.

## Projects

### PROJECT -1 | LEARNING EXPERIENCE PROGRAM (LXP)

Duration: 7 months

Role: Front-end Developer

- Developed the Learning Experience Program (LXP) web app for the World Health Organization (WHO) using Vue.js.
- Collaborated with a team of developers to design and implement the user interface and functionality for the website.
- Utilized HTML, CSS, and JavaScript to create a visually appealing and responsive web app that provided an engaging user experience.
- Integrated APIs to ensure seamless data integration and management.
- Conducted rigorous testing and troubleshooting to identify and resolve any technical issues, ensuring that the website was delivered on time and to the highest quality standards.
- Demonstrated a strong understanding of front-end development best practices and principles, including code optimization, accessibility, and usability.

### PROJECT - 2| IGAS

Duration: 6 + months

Role: PHP Developer

- Contributed to the development and maintenance of the IGAS project system for the Industrial Gases sector in the United Kingdom, using PHP, CodeIgniter, and MySQL.
- Fixed multiple issues in the existing system, ensuring that all bugs were identified and resolved in a timely manner.
- Demonstrated a strong ability to think according to the business layer, ensuring that all changes and enhancements were aligned with the goals and objectives of the organization.

- Maintained up-to-date knowledge of the latest PHP, CodeIgniter, and MySQL development trends and best practices, and incorporated these into the system as appropriate.
- Provided ongoing support and maintenance to the IGAS project management system, ensuring that the system was always up-to-date and met the evolving needs of the business.
- Note: These two projects were instrumental in changing my approach toward development and helped me to develop strong technical skills in HTML, CSS, Bootstrap, Vue.js, PHP, CodeIgniter, and MySQL. I gained a deep understanding of aligning technical solutions with business needs and developed critical thinking and problem-solving skills. Overall, these projects played a significant role in shaping my career and sparked a passion for creating innovative solutions. Additionally, I have worked on various small projects, which have helped me to become a versatile developer with strong front-end development, data management, and project management skills.
